PROFESSIONAL SUMMARY

Hard-working, self-taught Web Developer with over 5 years of experience in Web Development and a wide skillset. Detail-oriented problem solver looking to transition away from a management role and back into a Front-End Development position.

WORK HISTORY

Support Engineering Team Lead, 12/2018 to Current
Searchspring - Chattanooga, TN

- Remotely supervised and onboarded the support engineering team
- Acted as liaison between product, development, infrastructure, customer success, and implementations teams
- Quoted and implemented professional services for custom work primarily done in AngularJS, vanilla javascript, HTML and CSS
- Assisted development team by finding creative solutions for customers
- 2+ Years remote work experience and 5+ years of work experience in web development
- Handled technical communication with clients through email, phone, and screensharing utilities
- Succeeded in a fast-paced, high stress environment, including week long 24/7 on-call rotation every several weeks
- Pushed updates to AJAX Catalog integrations in production many times a day
- Maintained a very high level of individual contribution while also carrying out various management duties
- Debugged technical API issues
- Debugged data acquisition issues across a wide variety of feed generators, including E-Commerce API connectors, data feed modules, and custom-written PHP scripts

Front End Engineer, 08/2014 to 10/2016
Searchspring - Colorado Springs, Colorado

- Built and delivered clean and intuitive functional mockups to our customers before deadline
- After building the mockup, I would integrate our AJAX catalogs onto E-Commerce websites, replacing their Product Listing Page products with our own results
- Gathered functional requirements for on-boarding new customers
- Helped build new features and maintain old features in multiple AJAX catalogs
- Created backend scripts that would take customer's unformatted product data and turn it into usable JSON objects that would be returned by our API and used in our AJAX catalogs
